

### How do LCFS credits work?

The LCFS program works as a market system where owners of EV chargers, like you, earn credits based on charger utilization. The more your chargers are used, the more credits you earn. Emitters purchase those credits to offset their carbon footprint.

- 1** *Owners of EV chargers earn credits based on the carbon they displace.*
- 2** *Credits are sold to emitters that need carbon reductions.*
- 3** *Customers receive a quarterly check.*

### How Ecom-Energy Helps

- ✔ Maximize revenue with objective consulting.
- ✔ Monitor EV metrics (uptime, power costs, utilization, revenues, etc.).
- ✔ Utilize onsite renewables or RECs to enhance LCFS credits.
- ✔ File quarterly reports with CARB.
- ✔ Aggregate and sell credits in open market.
- ✔ Collect revenue and distribute to you!

#### Earn More with Renewable Energy

Fleets that strategically use renewable electricity for charging, or purchase renewable energy credits (RECs), can increase their LCFS revenue streams.

Ecom-Energy will help maximize these opportunities.

#### Revenues can be used to offset costs from...

- 
- ✔ EV Purchases & Maintenance
  - ✔ Purchase of Electricity
  - ✔ Administrative Fees
